Virtual Services

Our service offering is ever evolving. Due to the COVID-19 pandemic, and the mandatory quarantines which have been put into place, The CRP is only offering virtual services.

Some of our virtual services include ongoing assessment and case management, resource navigation, assistance with applying for benefits, and health education. Referrals can be made either by the individual or another agency working with that individual or family.

Do you want to make a difference?

The CRP is currently seeking volunteers to assist clients virtually. Training will be provided. No amount of availability too small!

Mission Statement

The Community Resource Project, Inc. (CRP), exists to provide supportive community services to individuals and families in need.

Morgan Gish, MSW/CCAR Trainer & Andrea Engle, RN/MBA/HA/CCAR started The CRP in March of 2020 as a direct result of the Covid-19 outbreak. Both women have extensive experience in developing and providing services for populations in need.

With the onset of Covid-19, they realized that Sumter County—especially the south end of the county—was going to need some assistance. So many of its citizens work check to check, sometimes shift to shift. As the numbers of unemployed went up nationally, and the numbers of Sumter Covid-19 cases increasing, it was clear to both women what they needed to do...and thus, The CRP was born!
