

Methodology for FL-520 - Citrus, Hernando, Lake, Sumter Counties CoC

Sheltered Population Total

1. What data source(s) was used to produce the total number of people included in the sheltered population (staying in an emergency shelter, Safe Haven, or transitional housing) on the night of the count? Please indicate the percentage of the PIT count derived from each of the sources. (If a source was not used, please enter zero).

HMIS Data	71%
Provider-level surveys	17%
Client-level surveys	0%
Observation	0%
Other	12%
Total	100%

2. Was the CoC able to collect information about the number of people being sheltered on the night of the count from all emergency shelters, Safe Havens, and transitional housing projects listed on the HIC or only some? listed on your HIC or only some?

- Complete census count

3. What information or method(s) was used to de-duplicate the count of the total number of people included in the sheltered population?

- Comparison of personally identifying information (PII), such as name, date of birth, and Social Security Number
- Comparison of unique client identifiers (not PII)

Sheltered Subpopulation

4. What data source(s) was used to produce the demographic and subpopulation data included in the sheltered population (staying in an emergency shelter, Safe Haven, or transitional housing) on the night of the count? (select all that were used)

- HMIS Data
- Provider-level surveys

Point In Time Methodology for FL-520 - Citrus, Hernando, Lake, Sumter Counties CoC

- Other: extrapolation

5. Was the CoC able to collect information about the demographic and subpopulation characteristics of all sheltered people or only some?

- All sheltered people

6. Looking at the change in your sheltered count from last year's count, please choose up to three reasons that best explains these changes from the drop down list below.

- Change in landlord partnerships
- Change in availability of affordable housing

Please provide a brief description of these specific factors (500 word limit):

Our community is still utilizing ESG-CV, as well as the additional VA funds to shelter those at a higher risk of COVID in non-congregate shelters and this has resulted in a higher number of people being in ES over last year's count. Landlords in our community have ceased being landlords, instead deciding to sell property, or if they are still renting property, they have raised the rents out of the means of the people currently enrolled in rapid rehousing & non-congregate shelter while looking for housing.

Unsheltered Population

7. What approach(es) was used to count the total number of people included in the unsheltered population during the PIT count. (select all that were used)

8. What information or method(s) was used to de-duplicate the total count of people in the unsheltered population? (Check all that apply)

Unsheltered Subpopulations

9. What approach(es) was used to collect demographic and subpopulation data about unsheltered people included in the unsheltered population during the PIT count?

10. Were all people who were encountered during canvassing on the night of the count or during post night of the count PIT activities asked to complete a survey/interview?

- All people encountered were surveyed

11. What information or method(s) was used to produce an unduplicated total count of homeless people across your sheltered and unsheltered populations?
